Personal Website

SUMMARY

Analytical and technically adept final-year Mechatronics Engineering and Computer Science (AI) student with a **distinction**-level academic record and a growing track record in financial analysis, valuation, and technology-driven innovation. Combines deep programming expertise in **Python, C++,** and **Java** with hands-on experience in **financial modeling, cost analysis,** and asset performance optimization. Demonstrated ability to **lead cross-functional teams** and deliver full-stack software solutions using **ReactJS, Flask,** and **.NET**. Adept at applying **machine learning** and quantitative analysis to solve real-world problems, with strong **communication, leadership,** and **critical thinking** skills developed through startup leadership and engineering internships. Eager to leverage technical and analytical strengths in fast-paced finance or fintech environments.

EDUCATION

Mechatronics Engineering (Honours) / Computer Science (AI)

September 2020 - August 2025

University of New South Wales

- Distinction WAM, achieved **Class 2 Division 1 Honours**.
- Course Highlights: Robotic Software Architecture (93), Computer Science Project (90), Computer Vision (90)

High School Year 11 & 12

April 2018 - May 2020

GEMS Modern Academy

- 97% in Grade XII ISC Board Exams; equivalent to a 99 ATAR.

PROFESSIONAL EXPERIENCE

Mechatronics Engineering Intern

January 2025 – July 2025

Toshiba International Corporation, Sydney

- Implemented **low latency python scripts** to help clients optimize asset performance of power plant systems by **automating** processes in simulations.
- Utilised monitoring software such as EtaPRO APR, Virtual Plant to aid clients in identifying operational inefficiencies and proposed data driven actionable solutions.
- Leveraged data from EtaPRO diagnostics to perform system-level and component-level analyses to optimize functionality and monitor asset health.
- Improved company's intra-net website through development in Microsoft SharePoint and ReactJS, provided solutions to UI/UX inconsistencies in existing website.

Investment Banking Intern

July 2024 - August 2024

Shaw and Partners, Sydney

- **Identified potential clients** through share escrow research, assisting sales desk outreach.
- Helped compile a list of target clients and hedge funds that have not been contacted and the ones who have shown interest in buying stocks in order to **raise money** for companies managed by Shaw and Partners.
- Did research on initiations made by Shaw and Partners on their clientele and compiled all relevant information in an Excel spreadsheet.
- Studied the methodology that goes behind **quantitative research** and factors affecting BUY, HOLD, and SELL ratings of companies.

CEO/Co-Founder
Serv2U, Sydney

May 2023 - March 2024

- Led recruitment to hire top talent interns in Australia, US and Canada, boosting team capabilities and facilitating high quality production in **UI/UX design** and **web-application development**.
- **Optimized operations** by streamlining workflow using **Jira** and **Asana** and hosting weekly standup meetings to discuss updates in marketing, UI/UX, software development, and brainstorming future tasks and goals.
- Led backend system engineering team to program **APIs** with **Flask** and **Python**, to execute core business logic, enforce restrictions on website, and manage cloud database systems hosted on MongoDB.
- Delegated tasks to a team of 20 employees ranging in multiple disciplines across **software engineering, UI/UX, finance, and marketing**.
- Developed **financial strategies** by identifying potential investors and venture capitalist firms to **raise funding** in initial investment rounds for Serv2U.

PERSONAL PROJECTS AND EXTRA CURRICULARS

Machine Learning Engineer
Kaggle SeaTurtleID2022 Challenger

September 2024 - December 2024

- Implemented the **Modern Portfolio Theory** to **optimize asset allocation** in a **python** program to produce an optimal portfolio based on user's input of desired stocks

JP Morgan Chase Investment Banking Job Simulation
Forge

March 2025 – March 2025

- Identified an ideal **M&A** target for a client based on an assessment of their **strategic** and **financial criteria**.
- Constructed a **discounted cash flow (DCF) model** to calculate the valuation of the M&A target and adjusted the model to account for a competitor bid and supply chain interruption.
- Created a 2-pager for the client containing a company profile and summary of the auction process.
- Achieved certification on completion of job simulation.

Software Engineer
Stock Price Prediction Model

December 2024 – March 2025

- Designed a **Python script** using **Scikit-learn**, and **TensorFlow** to **predict stock** price based on historical stock data.
- **Enhanced predictive performance** by implementing financial indicators such as **moving averages** and **relative strength index (RSI)**.
